

## Who We Are?

You can easily sense that using navigation system how makes your life more easy in your car, mobile phone or when you are travelling a city that you do not know. The importance of navigation is increasing rapidly as all around the world.Navturk designated that putting up this market to the top by making important investments on the sector.

Navturk creates a worl standart system and in corporation with the producers that are leaders in their field.When you use the Navturk&rsquo;s streetwide software you can easily reach your destination and many interest points on your route (such as restaurants, hospitals,museums,banks, car service points..).You can reach your destination more fast and confident by using the Turkey&rsquo;s first and most developed navigation system, Navturk.

Navturk protect it&rsquo;s location becoming market leader in Turkey.The most important reason of this is including 81 prvince with street details.Accountancy, implicating the new building cross roads, limited ways and new points of interests(POI) by updating continuously.

All the same time working essential hardware companies, Navturk is not responsible for the features of devices and warranty conditions..

### MORE COVERAGE AREA

Our wide coverage area : 81 province, 500 district, 200.000 points of interests, 3.636 km express highway ,10.606 boulevard, 115.884 avenue, 324.659 street&hellip;

Navturk accetes new streets, avenues, points of interests in it&rsquo;s software day by day.Continuously developing software is updating every 6 months with adjustments to world standarts and services to you in many short time.

Navturk not also give you chance to reach from A point to B but also services the point of interests which are taking place on your route.There are existence many points such as hotels, hospitals , restaurants and 200.000 points like those.

By means of stereoscopic map of Navturk, it can be easier yo find the target or points of interests.

### UP TO DATE AND RIGHT MAPS

Yf it is considered that the street names are changing rapidly in our country, it is so difficult that creating a succesful navigation map.Providing the map stay up to date and giving full particulars are diffiult as creating the map.Navturk field team log millions of km way to make all of those.Because of all that there are important points that should take into account when choosing a navigation system:

&bull; Time of updating

&bull; Coverage area of street details

- Correctness of traffic flow
- Coverage of points of interests and it's up to date
- Wiev of the map(stereoscopic or two\_dimensional)
